

AMAN DHAWAN

Senior Product Manager | AI & Enterprise SaaS

Mumbai, India | aman.dhawan1995@gmail.com | +91-8655207728 | linkedin.com/in/amandhawan

7+ years driving product strategy across AI, enterprise SaaS & regulated healthcare - shipping 0→1 products at global scale

WORK EXPERIENCE

Senior Product Manager

HowNow Technologies

(Apr'25 – Present)

PM for AI products on HowNow, a UK-based enterprise learning platform serving global corporate clients.

- Led strategy and end-to-end delivery of AI Guru, an LLM-powered coaching agent built on RAG, vector embeddings, and Gemini/ChatGPT APIs - driving 1,000+ Gurus created within 10 days of launch and a 22% reduction in hallucination rates via a custom AI evals framework.
- Shipped Line Manager View, an AI conversational analytics interface letting managers query team learning data in plain English - the system translates questions into database queries and returns answers as tables and charts; adopted by 60%+ of active managers within the first quarter, driving a 38% increase in manager engagement.
- Owned Manage Pages end-to-end - authored the PRD, produced designs myself using AI tools, and led the squad through a migration of the legacy Ruby on Rails frontend to React, resolving core architectural debt that had made new builds fail repeatedly; cut new-feature development effort by ~40% and unblocked the product roadmap.
- Established product analytics from the ground up — secured stakeholder buy-in for data-informed decision-making and led end-to-end Mixpanel implementation across the platform, authoring 70+ events across 15 core user journeys and cutting time-to-insight for product decisions from ~2 weeks of manual data pulls to same-day.

Product Manager

PharmaSecure

(Mar'21 – Apr'25)

Owned the product suite - serialization, anti-counterfeit verification, and patient engagement - securing medicine supply chains for 5 of India's top 10 pharma companies.

- Drove the market's first-mover response to India's Drugs Eighth Amendment Rules (2022) — tracked the mandate from draft stage, personally led customer awareness and lead engagement, and shipped MVPs with Abbott and Sun Pharma; made PharmaSecure the first provider to deliver 100% client compliance, well ahead of the government deadline.
- Scaled psVerify to 8B+ serialized medicine packs across 150+ clients and 600+ packaging lines, powering 150M+ consumer verifications through its dynamic QR model.
- Identified psConnect v1.0's structural ceiling (field-rep dependent, linear cost growth) and led its rebuild as a self-serve iOS/Android platform with workflow automation and a configurable rewards engine — lifting adoption 30%, engagement 100%, and growing the patient base 12x to 253K+ users.
- Evolved psID Trail from a compliance cost centre into a commercial intelligence platform — real-time diversion detection, distributor analytics, and time-to-market metrics — creating a new recurring revenue stream.
- Built Power BI dashboards and feedback loops surfacing retention drivers and churn risk; overhauled a 50+ item legacy backlog and instituted a structured prioritization framework.

Sales Executive

Wipro CCLG

(Oct'19 – Jan'21)

- Led a 4-member territory sales team, exceeding KPIs for 8 consecutive months; conducted market and user research feeding product and GTM planning for smart device launches — the customer-insight work that led to the move into product management.

Senior Sales Officer

Berger Paints India

(May'18 – Oct'19)

Led a team of 5 while managing key B2B and retail accounts across Mumbai, driving trade promotions, dealer training, and channel performance.
